Swarm behaviour

particularly those by species of dragonflies, beetles, butterflies, and moths. The distance can vary from species to species, but in most cases these movements

Swarm behaviour, or swarming, is a collective behaviour exhibited by entities, particularly animals, of similar size which aggregate together, perhaps milling about the same spot or perhaps moving en masse or migrating in some direction. It is a highly interdisciplinary topic.

As a term, swarming is applied particularly to insects, but can also be applied to any other entity or animal that exhibits swarm behaviour. The term flocking or murmuration can refer specifically to swarm behaviour in birds, herding to refer to swarm behaviour in tetrapods, and shoaling or schooling to refer to swarm behaviour in fish. Phytoplankton also gather in huge swarms called blooms, although these organisms are algae and are not self-propelled the way most animals are. By extension, the term "swarm" is applied also to inanimate entities which exhibit parallel behaviours, as in a robot swarm, an earthquake swarm, or a swarm of stars.

From a more abstract point of view, swarm behaviour is the collective motion of a large number of self-propelled entities. From the perspective of the mathematical modeller, it is an emergent behaviour arising from simple rules that are followed by individuals and does not involve any central coordination. Swarm behaviour is also studied by active matter physicists as a phenomenon which is not in thermodynamic equilibrium, and as such requires the development of tools beyond those available from the statistical physics of systems in thermodynamic equilibrium. In this regard, swarming has been compared to the mathematics of superfluids, specifically in the context of starling flocks (murmuration).

Swarm behaviour was first simulated on a computer in 1986 with the simulation program boids. This program simulates simple agents (boids) that are allowed to move according to a set of basic rules. The model was originally designed to mimic the flocking behaviour of birds, but it can be applied also to schooling fish and other swarming entities.

Miraculous: Tales of Ladybug & Cat Noir is a French CGI action/adventure animated series produced by Zagtoon and Method Animation, in co-production with Toei Animation, SAMG Animation, and De Agostini S.p.A. It features two Parisian teenagers, Marinette Dupain-Cheng and Adrien Agreste, who transform into the superheroes Ladybug and Cat Noir, respectively, to protect the city from supervillains, created by the main supervillain Hawk Moth (renamed Shadow Moth in season 4 and Monarch in season 5). It airs in about 150 countries, each with its own order of episodes.

Prior to its debut in France in October 2015 on TF1, the series was first shown in South Korea in September 2015 on EBS1. In the US, the series debuted on Nickelodeon in December 2015 before it was removed from the network's schedule in 2016. In April 2019, the series was picked up by Disney Channel. It also aired on the KidsClick programming block until its shutdown in March 2019.

In December 2016, Zag announced that Netflix had acquired USA video-on-demand streaming rights to Miraculous for seasons 1–3. The second season premiered in France on TF1's TFOU block in October 2017, and other channels throughout Europe. The world premiere of Season 3 was in Spain and Portugal on the Disney Channel in December 2018. In September 2019, it was confirmed by Zag that the air date for season 4 was slated for late 2020, but this was pushed to 2021, due to the COVID-19 pandemic. The fourth season premiere, "Furious Fu", was aired in Brazil on Gloob in March 2021. In France, the fourth season premiered on in April 2021, and on Disney Channel US in June 2021. In April 2021, it was announced that season 6 and 7, were in production. In July 2022, an eighth season was greenlit. On 6 January 2025, it was announced that the sixth season would premiere on Disney Channel and Disney XD US on 25 January 2025, while the sixth season would premiere on 23 March 2025 in France.

Corfu

of responsible butterfly enthusiasts has grown (731 members at the time of writing) who share their passion for the butterflies and moths found on the island

Corfu (kor-FEW, -?FOO, US also KOR-few, -?foo) or Kerkyra (Greek: ????????, romanized: Kérkyra, pronounced [?cercira]) is a Greek island in the Ionian Sea, of the Ionian Islands; including its small satellite islands, it forms the margin of Greece's northwestern frontier. The island is part of the Corfu regional unit, and is administered by three municipalities with the islands of Othonoi, Ereikoussa, and Mathraki. The principal city of the island (pop. 32,095) is also named Corfu. Corfu is home to the Ionian University.

The island is bound up with the history of Greece from the beginnings of Greek mythology, and is marked by numerous battles and conquests. Ancient Korkyra took part in the Battle of Sybota which was a catalyst for the Peloponnesian War, and, according to Thucydides, the largest naval battle between Greek city states until that time. Thucydides also reports that Korkyra was one of the three great naval powers of Greece in the fifth century BCE, along with Athens and Corinth. Ruins of ancient Greek temples and other archaeological sites of the ancient city of Korkyra are located in Palaiopolis. Medieval castles punctuating strategic locations across the island are a legacy of struggles in the Middle Ages against invasions by pirates and the Ottomans. Two of these castles enclose its capital, which is the only city in Greece to be surrounded in such a way. As a result, Corfu's capital has been officially declared a kastropolis ("castle city") by the Greek government.

From medieval times and into the 17th century, the island, as part of the Republic of Venice since 1204, successfully repulsed the Ottomans during several sieges, was recognised as a bulwark of the European States against the Ottoman Empire and became one of the most fortified places in Europe. The fortifications of the island were used by the Venetians to defend against Ottoman intrusion into the Adriatic. In November 1815 Corfu came under British rule following the Napoleonic Wars, and in 1864 was ceded to modern Greece by the British government along with the remaining islands of the United States of the Ionian Islands under the Treaty of London. Corfu is the origin of the Ionian Academy, the first university of the modern Greek state, and the Nobile Teatro di San Giacomo di Corfù, the first Greek theatre and opera house of modern Greece. Ioannis Kapodistrias, the first governor of independent Greece after the revolution of 1821, founder of the modern Greek state, and a distinguished European diplomat, was born in Corfu.

In 2007, the city's old town was added to the UNESCO World Heritage List, following a recommendation by ICOMOS. The 1994 European Union summit was held in Corfu. The island is a popular tourist destination.

List of Emily Dickinson poems

signature of 2 leaves and 4 pages), laid on top of each other (not nested), and bound with string. Other poems are preserved in what R. W. Franklin calls

This is a list of poems by Emily Dickinson. In addition to the list of first lines which link to the poems' texts, the table notes each poem's publication in several of the most significant collections of Dickinson's

poetry—the "manuscript books" created by Dickinson herself before her demise and published posthumously in 1981; the seven volumes of poetry published posthumously from 1890 to 1945; the cumulative collections of 1924, 1930, and 1937; and the scholarly editions of 1955 and 1998.

Important publications which are not represented in the table include the 10 poems published (anonymously) during Dickinson's lifetime; and editions of her letters, published from 1894 on, which include some poems within their texts. In all these cases, the poem itself occurs in the list, but these specific publications of the poem are not noted.
