Quicksilver (Marvel Comics)

Quicksilver (Pietro Django Maximoff) is a fictional character appearing in American comic books published by Marvel Comics. The character first appeared

Quicksilver (Pietro Django Maximoff) is a fictional character appearing in American comic books published by Marvel Comics. The character first appeared in the comic book *The Uncanny X-Men* #4 (March 1964) and was created by Stan Lee and Jack Kirby. The character has since starred in two self-titled limited series and has historically been depicted as a regular team member in the superhero title *The Avengers*.

Quicksilver has the superhuman ability to move at great speeds. In most depictions, he is a mutant, a human born with innate superhuman powers. In comic book stories beginning in 2015, he is the product of genetic experimentation by the High Evolutionary. Quicksilver most commonly appears in fiction associated with the X-Men, having been introduced as an adversary for the superhero team. In later stories, he became a superhero himself. He is the older twin brother of the Scarlet Witch and, in most depictions, the son of Magneto and a Sinti woman Magda, and the half-brother of Polaris.

Debuting in the Silver Age of comic books, Quicksilver has featured in several decades of Marvel continuity, starring in the self-titled series *Quicksilver* and as a regular team member in superhero title *the Avengers*.

The character has also appeared in a range of movie, television, and video game adaptations. Two separate live-action versions of Quicksilver have been adapted by two different film studios: Aaron Taylor-Johnson portrayed the character in the Marvel Cinematic Universe (MCU) franchise, appearing in *Captain America: The Winter Soldier* (2014) as a cameo and *Avengers: Age of Ultron* (2015) while Evan Peters portrayed him in the 20th Century Fox films *X-Men: Days of Future Past* (2014), *X-Men: Apocalypse* (2016) and *Dark Phoenix* (2019), as well as a cameo in *Deadpool 2* (2018). Peters later appeared as an imposter Pietro in the MCU television series *WandaVision* (2021), as a nod to his past role.

Quicksilver Messenger Service

Quicksilver Messenger Service is an American psychedelic rock band formed in 1965 in San Francisco. The band achieved wide popularity in the San Francisco

Quicksilver Messenger Service is an American psychedelic rock band formed in 1965 in San Francisco. The band achieved wide popularity in the San Francisco Bay Area and, through their recordings, with psychedelic rock enthusiasts around the globe, and several of their albums ranked in the Top 30 of the Billboard Pop charts. They were part of the new wave of album-oriented bands, achieving renown and popularity despite a lack of success with their singles (only one, "Fresh Air" charted, reaching number 49 in 1970). Though not as commercially successful as contemporaries Jefferson Airplane and the Grateful Dead, Quicksilver was integral to the beginnings of their genre. With their jazz and classical influences and a strong folk background, the band attempted to create an individual, innovative sound. Music historian Colin Larkin

wrote: "Of all the bands that came out of the San Francisco area during the late '60s, Quicksilver typified most of the style, attitude and sound of that era."

The band's members included John Cipollina, Gary Duncan, Greg Elmore, David Freiberg, Nicky Hopkins, and Dino Valenti. Valenti drew heavily on musical influences he picked up during the folk revival of his formative musical years. The style he developed from these sources is evident in Quicksilver Messenger Service's swing rhythms and twanging guitar sounds. After many years, the band has attempted to re-form despite the deaths of several members. In 2006, Duncan and Freiberg toured as the Quicksilver Messenger Service, using various backing musicians.

Mercury (element)

element; it has symbol Hg and atomic number 80. It is commonly known as quicksilver. A heavy, silvery d-block element, mercury is the only metallic element

Mercury is a chemical element; it has symbol Hg and atomic number 80. It is commonly known as quicksilver. A heavy, silvery d-block element, mercury is the only metallic element that is known to be liquid at standard temperature and pressure; the only other element that is liquid under these conditions is the halogen bromine, though metals such as caesium, gallium, and rubidium melt just above room temperature.

Mercury occurs in deposits throughout the world mostly as cinnabar (mercuric sulfide). The red pigment vermilion is obtained by grinding natural cinnabar or synthetic mercuric sulfide. Exposure to mercury and mercury-containing organic compounds is toxic to the nervous system, immune system and kidneys of humans and other animals; mercury poisoning can result from exposure to water-soluble forms of mercury (such as mercuric chloride or methylmercury) either directly or through mechanisms of biomagnification.

Mercury is used in thermometers, barometers, manometers, sphygmomanometers, float valves, mercury switches, mercury relays, fluorescent lamps and other devices, although concerns about the element's toxicity have led to the phasing out of such mercury-containing instruments. It remains in use in scientific research applications and in amalgam for dental restoration in some locales. It is also used in fluorescent lighting. Electricity passed through mercury vapor in a fluorescent lamp produces short-wave ultraviolet light, which then causes the phosphor in the tube to fluoresce, making visible light.

Max Mercury

and Lightning, is a DC Comics superhero similar to Quality Comics' Quicksilver. Initially an obscure speedster, the character was rebooted by Mark Waid

Max Mercury (Maxwell Crandall), also known as Windrunner, Whip Whirlwind, and Lightning, is a DC Comics superhero similar to Quality Comics' Quicksilver. Initially an obscure speedster, the character was rebooted by Mark Waid in 1993 in the pages of The Flash and turned into a mentor for Wally West and Bart Allen.

Max Mercury appears in the television series The Flash, portrayed by Trevor Carroll.

Quicksilver is a 1986 American drama film written and directed by Thomas Michael Donnelly and starring Kevin Bacon. The film, which was distributed by Columbia Pictures, also stars Jami Gertz, Paul Rodriguez, Louie Anderson, Laurence Fishburne, and Rudy Ramos.

Quicksilver (software)

Quicksilver is a utility app for macOS. Originally developed as proprietary freeware by Nicholas Jitkoff of Blacktree, Inc., it is now an open-source

Quicksilver is a utility app for macOS. Originally developed as proprietary freeware by Nicholas Jitkoff of Blacktree, Inc., it is now an open-source project hosted on GitHub.

Quicksilver is essentially a graphical shell for the macOS operating system, allowing users to use the keyboard to rapidly perform tasks such as launching other apps, manipulating files, or sending e-mail. Since its first release in 2003, many of its features have subsequently been integrated into the modern macOS system feature, Spotlight. It is similar to the macOS applications LaunchBar and Alfred, but uses a different interaction paradigm. Because of its flexible interface and extensibility, Quicksilver has been called one of the top productivity applications on the Mac.

Quiksilver

Quiksilver is a brand of surf-inspired apparel and accessories that was founded in 1969 in Torquay, Victoria, but is now based in Huntington Beach, California. It is one of the world's largest brands of surfwear and boardsport-related equipment. The parent company changed its name in March 2017 from Quiksilver, Inc. to Boardriders, Inc., and is the owner of the brands Quiksilver, Roxy and DC Shoes. In 2018, Boardriders acquired Billabong International Limited, gaining the Billabong, Element, Von Zipper, RVCA and XCEL brands. Authentic Brands Group bought Boardriders and its associated brands and intellectual property in 2023.

Quiksilver manufactures and sells a wide range of products that include sportswear (swimsuits), clothing (T-shirts, polo shirts, flannels, jackets, hoodies, pants, shorts), footwear (sneakers, sandals), and accessories (hats, backpacks, and wallets). The company also produces a line of apparel for young women, under the Roxy brand. Another line of apparel for women is sold under the brand Quiksilver Women.

Quicksilver (novel)

Quicksilver is a historical novel by Neal Stephenson, published in 2003. It is the first volume of The Baroque Cycle, his late Baroque historical fiction

Quicksilver is a historical novel by Neal Stephenson, published in 2003. It is the first volume of The Baroque Cycle, his late Baroque historical fiction series, succeeded by The Confusion and The System of the World (both published in 2004). Quicksilver won the Arthur C. Clarke Award and was nominated for the Locus Award in 2004. Stephenson organized the structure of Quicksilver such that chapters have been incorporated into three internal books titled "Quicksilver", "The King of the Vagabonds", and "Odalisque". In 2006, each internal book was released in separate paperback editions, to make the 900 pages more approachable for readers. These internal books were originally independent novels within the greater cycle during composition.

The novel Quicksilver is written in various narrative styles, such as theatrical staging and epistolary, and follows a large group of characters. Though mostly set in England, France, and the United Provinces in the period 1655 through 1673, the first book includes a frame story set in late 1713 Massachusetts. In order to write the novel, Stephenson researched the period extensively and integrates events and historical themes important to historical scholarship throughout the novel. However, Stephenson alters details such as the members of the Cabal ministry, the historical cabinet of Charles II of England, to facilitate the incorporation of his fictional characters. Within the historical context, Stephenson also deals with many themes which pervade his other works, including the exploration of knowledge, communication and cryptography.

The plot of the first and third books focus on Daniel Waterhouse's exploits as a natural philosopher and friend to the young Isaac Newton and his later observations of English politics and religion, respectively. The second book introduces the vagabond Jack Shaftoe ("King of the Vagabonds") and Eliza (a former member of a Turkish harem) as they cross Europe, eventually landing in the Netherlands, where Eliza becomes entangled in commerce and politics. Quicksilver operates in the same fictional universe as Stephenson's earlier novel Cryptonomicon, in which descendants of Quicksilver characters Shaftoe and Waterhouse appear prominently.
