New York Regents Examinations

Science Teacher: New York State (NYS) Regents Preparation The Physical Setting/Earth Science – #1 Earth Science Regents Review Website JMAP – Regents

In New York State, Regents Examinations are statewide standardized examinations in core high school subjects. Students were required to pass these exams to earn a Regents Diploma. To graduate, students are required to have earned appropriate credits in a number of specific subjects by passing year-long or half-year courses, after which they must pass at least five examinations. For higher-achieving students, a Regents with Advanced designation and an Honors designation are also offered. There are also local diploma options. Passing the exams will no longer be a condition of graduation beginning in the 2027-28 school year.

The Regents Examinations are developed and administered by the New York State Education Department (NYSED) under the authority of the Board of Regents of the University of the State of New York. Regents exams are prepared by a conference of selected New York teachers of each test's specific discipline who assemble a test map that highlights the skills and knowledge required from the specific discipline's learning standards. The conferences meet and design the tests three years before the tests' issuance, which includes time for field testing and evaluating testing questions.

Bronx High School of Science

college science courses. Over 100 unique courses are offered. All New York State Regents classes are offered, with the exception of earth science. In the

The Bronx High School of Science is a public specialized high school in the Bronx in New York City. It is operated by the New York City Department of Education. Admission to Bronx Science involves passing the Specialized High Schools Admissions Test.

Founded in 1938 in the Bronx, Bronx Science is located in what is now Kingsbridge Heights, also known as Jerome Park, a neighborhood in the northwest portion of the Bronx. Although originally known for its focus on mathematics and science, Bronx Science also emphasizes the humanities and social sciences.

The Bronx High School of Science is often called Bronx Science, Bronx Sci, BX Sci, and sometimes just Science. It was formerly called Science High, and its founder, Morris Meister, is said to have frequently called the school "The High School of Science".

Oceanography

physics, chemistry, biology, and geology. It is an Earth science, which covers a wide range of topics, including ocean currents, waves, and geophysical

Oceanography (from Ancient Greek ??????? (??keanós) 'ocean' and ????? (graph?) 'writing'), also known as oceanology, sea science, ocean science, and marine science, is the scientific study of the ocean, including its physics, chemistry, biology, and geology.

It is an Earth science, which covers a wide range of topics, including ocean currents, waves, and geophysical fluid dynamics; fluxes of various chemical substances and physical properties within the ocean and across its boundaries; ecosystem dynamics; and plate tectonics and seabed geology.

Oceanographers draw upon a wide range of disciplines to deepen their understanding of the world's oceans, incorporating insights from astronomy, biology, chemistry, geography, geology, hydrology, meteorology and physics.

Subhash Kak

Indian-American computer scientist and historical revisionist. He is the Regents Professor of the School of Electrical & Computer Engineering at Oklahoma

Subhash Kak is an Indian-American computer scientist and historical revisionist. He is the Regents Professor of the School of Electrical & Computer Engineering at Oklahoma State University–Stillwater, an honorary visiting professor of engineering at Jawaharlal Nehru University, and a member of the Indian Prime Minister's Science, Technology and Innovation Advisory Council (PM-STIAC).

Kak has published on the history of science, the philosophy of science, ancient astronomy, and the history of mathematics. Kak has also published on archaeoastronomy, and advocated the idea of Indigenous Aryans. Many scholars have rejected his theories on these topics in entirety, and his writings have been heavily criticized.

In 2019, the Government of India awarded him the Padma Shri, the fourth highest civilian award in India.

Liverpool High School

students with the minimum of a Regents Diploma, but some may also graduate with a less advanced local diploma. The Regents Diploma with Advanced Designation

Liverpool High School (LHS) is a comprehensive public high school in Liverpool, New York, northwest of Syracuse in the Liverpool Central School District, serving ninth to twelfth grade students. It is the only high school in the district. LHS generally accepts students graduating from Liverpool Middle School, Soule Road Middle School, Chestnut Hill Middle School, and Morgan Road Middle School. The school is governed under the authority of the New York State Education Department, whose standardized examinations are designed and administered by the Board of Regents of the University of the State of New York.

Paleontological Research Institution

national levels to learn about a wide variety of topics, including ecology, evolution, Earth science, energy, and climate change. The Education Department

The Paleontological Research Institution, or PRI, is a paleontological organization in Ithaca, New York, with a mission including both research and education. PRI is affiliated with Cornell University, houses one of the largest fossil collections in North America, and publishes, among other things, the oldest journal of paleontology in the western hemisphere, *Bulletins of American Paleontology*.

PRI's facilities include the Museum of the Earth, a natural history museum that houses some of PRI's collections for public viewing and educates visitors on the history of life on Earth, and, since 2013, the

Cayuga Nature Center, an educational venue with a focus on outdoor and environmental education.

The 360s decade ran from January 1, 360, to December 31, 369.

University of California

began to agree to submit to the regents's governance during the term of President Benjamin Ide Wheeler, as the Board of Regents had come to recognize the problems

The University of California (UC) is a public land-grant research university system in the U.S. state of California. Headquartered in Oakland, the system is composed of its ten campuses at Berkeley, Davis, Irvine, Los Angeles, Merced, Riverside, San Diego, San Francisco, Santa Barbara, and Santa Cruz, along with numerous research centers and academic centers abroad. The system is the state's land-grant university.

In 1900, UC was one of the founders of the Association of American Universities and since the 1970s seven of its campuses, in addition to Berkeley, have been admitted to the association. Berkeley, Davis, Irvine, Los Angeles, Santa Barbara, Santa Cruz, Riverside, and San Diego are considered Public Ivies, making California the state with the most universities in the nation to hold the title. UC campuses have large numbers of distinguished faculty in almost every academic discipline, with UC faculty and researchers having won 71 Nobel Prizes as of 2021.

The system's ten campuses have a combined student body of 299,407 students, 26,100 faculty members, 192,400 staff members and over 2.5 million living alumni. Its newest campus in Merced opened in fall 2005. Nine campuses enroll both undergraduate and graduate students; one campus, UC San Francisco, enrolls only graduate and professional students in the medical and health sciences. In addition, the University of California College of the Law located in San Francisco is legally affiliated with UC and shares its name but is otherwise autonomous. Under the California Master Plan for Higher Education, the University of California is a part of the state's three-system public higher education plan, which also includes the California State University system and the California Community Colleges system. UC is governed by a Board of Regents whose autonomy from the rest of the state government is protected by the state constitution. The University of California also manages or co-manages three national laboratories for the U.S. Department of Energy: Lawrence Berkeley National Laboratory (LBNL), Lawrence Livermore National Laboratory (LLNL), and Los Alamos National Laboratory (LANL).

The University of California was founded on March 23, 1868, and operated in Oakland, where it absorbed the assets of the College of California before moving to Berkeley in 1873. It also affiliated itself with independent medical and law schools in San Francisco. Over the next eight decades, several branch locations and satellite programs were established across the state. In March 1951, the University of California began to reorganize itself into something distinct from its campus in Berkeley, with UC president Robert Gordon Sproul staying in place as chief executive of the UC system, while Clark Kerr became Berkeley's first chancellor and Raymond B. Allen became the first chancellor of UCLA. However, the 1951 reorganization

was stalled by resistance from Sproul and his allies, and it was not until Kerr succeeded Sproul as UC president that UC was able to evolve into a university system from 1957 to 1960. At that time, chancellors were appointed for additional campuses and each was granted some degree of greater autonomy.
